

## Unit 4 Project

### Online Safety

#### Project details:

Create a power point or prezi on the topic of **online safety**. It is up to you to choose the direction that you go with this. (Examples of topics may include: privacy and identity theft, online predators, cyberbullying, online reputation, online dating, radicalization, etc.) Include information about your chosen topic, and relevant visuals to enhance the information that you present.

Investigate the what, when, where and how of your topic (eg. How to recognize, how to prevent, how to respond).

Within your presentation, demonstrate the following:

- Elements of design (line, shape, form, space, value, colour, texture)
- Principles of design (balance, emphasis, proportion, contrast, movement, unity)
- Typography (sizing, spacing, line, white space, decorative type)

Presentation length: 5 - 10 slides on your topic, plus include a final slide where you clearly outline what aspects of the elements and principles of design and typography you have demonstrated on **each slide**. (Refer back to unit 4.) Do not just list them, but rather provide detail about how you illustrated each one (see example below).

Eg. Slide 1: Used two different font types (Arial on the title, sans serif in the text paragraph), and varied text size. Colour changes in font are evident. Image shows balance, symmetry and space in the display of the road leading into the mountains. Contrast is illustrated in the black image over the pink background. \*You will have an entry like this one on your last slide, for each slide in your project.

(Therefore the minimum length of your presentation is 6 slides and the maximum is 11 slides).

Be creative. Include topic related visuals, images, charts etc.

Include interesting facts.

Include a bibliography. You must make sure that you cite all of your resources at the end of the project. Minimum of three sources is required.

**Presentation formats may include:**

Prezi Presentation – If you use this format, copy your completed project link into a word document and submit the word document into the assignment folder. Note: It must be the “shared link”, or your teacher will not be about to open your prezi.

Power point or google slides

Contact your teacher to approve an alternative tool that is not listed here.

**Rubric:**

Use the Project Rubric to help guide your project. Make sure that you have addressed all of the required project details outlined above.

When you have finished your project, add it to the Unit 4 project assignment folder. Label your project as follows: U4Project(your surname). Eg. U4ProjectBauer
