

# Unit 4

Name:

Date:

## Reader's Notebook: Live From LEGOLAND

### Before Reading

---

Answer the following:

|    |                                     |                    |
|----|-------------------------------------|--------------------|
| 1. | Why do people like to build models? | Answers will vary. |
|----|-------------------------------------|--------------------|

### During Reading

---

If you look closely at the model you will see great details in how it was made. Answer the following questions:

|    |                                                                                  |                                                                                                                             |
|----|----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| 1. | What is one detail that you notice about how and where the photograph was taken? | The photograph was taken from the top looking down.                                                                         |
| 2. | Where do you think the photographer stood to take the picture?                   | The photographer probably stood above the model (aerial shot) off to the left side and took a close up shot from above.     |
| 3. | How can you tell?                                                                | The left side is close to the viewer. Much of the site can be seen, as well as people walking to the right side of picture. |

### After Reading

---

Respond to the following:

|    |                                               |                                                                                                                                          |
|----|-----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | Why might a person enjoy making this village? | People might build models for enjoyment. They may have a passion about creating something from small pieces. Some people love LEGO, etc. |
|----|-----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|

|    |                                                                                          |                                                                                                                                                                                                                                                                                                |
|----|------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2. | Would you enjoy working on a complicated construction like this?                         | Some students may enjoy working on complicated structures such as Lego models, works of art, machines, etc. because they like working with their hands and feel proud in accomplishing a difficult task. Other students may find complicated structures overwhelming and prefer simpler tasks. |
| 3. | Have you made LEGO models?                                                               | Answers will vary.                                                                                                                                                                                                                                                                             |
| 4. | If so, have you tried to make complicated models? Provide details about your experience. | Students should provide specific details about their successes and challenges in such difficult tasks.                                                                                                                                                                                         |
