2. In the following assignment, you’ll write a letter expressing an opinion. If you’re unsure of how to write a formal letter, refer to page 143 in your *English Language Arts Handbook for Secondary Students*.

**Choose either A or B.**

A. One of the main issues related to technology is that it may cause unemployment. One piece of equipment can sometimes replace several human workers.

Suppose that you were working in a plant, and you learned that the owner was considering shutting down the factory because new technology in a nearby plant had made this factory obsolete. Write a letter to Mrs. Marchand, the owner of the factory, protesting its closure.

Add whatever information you feel you need (for example, the number of workers who will be affected or the type of manufacturing done in the plant). Be sure to discuss the impact of closing the plant on individuals and the community.

- B. Another issue related to technology is that some new procedures offend some people’s moral beliefs. For example, some people object to the technology of stem cell research.

Write a letter to your local paper, expressing your opinion about human stem cell research. In your letter, discuss both the advantages and disadvantages of this research, but you should also make your position clear.

- Suppose that the town in which you live or work is considering installing a video surveillance camera in an intersection where several collisions have occurred. Car owners would be fined for any infractions (such as speeding, failing to stop, or turning left unsafely). Members of the community have been invited to express their opinion about the use of this equipment at a local meeting.

Write a speech in which you express your opinion about the use of video surveillance to fine drivers who break laws. Your speech should take approximately three minutes to present.

8. A recent newspaper article about television has prompted the following letters to the editor.

Letter A

Television makes people into couch potatoes. It rots their minds. It keeps them from doing more important things. It destroys creativity and imagination. It makes people physically and intellectually lazy. It destroys their ability to concentrate. It shortens their attention span so they can't listen long enough or apply themselves to any task long enough to learn from it. It makes them dissatisfied with their lives because their lives don't seem as glamorous and exciting as the ones they see on TV. Watching too much TV can give people a distorted view of reality, and it can cause some people to adopt anti-social and violent behaviour. Society would be better off without television.

Letter B

Television is mind-expanding. It can take you to more places on Earth than you could ever hope to see in your lifetime. In the same day, it can take you into orbit and then onto the ocean floor. It can transport you into the past and into the future. It can teach you about things that you never even knew existed. It can inspire you to dream. TV is the most powerful learning tool ever developed. It's the most important technology that has ever been developed. It has changed the world for the better, and it will make the future even brighter.

With which of the two views do you agree? Write a letter to the editor expressing your opinion on the topic of television viewing. Remember to support your ideas with details and reasons. Pay attention to the tone of your letter. Letters to the editor should promote a solution rather than inflame the issue. Your letter should be approximately 200 words in length.
