Module 6 Lesson 2
Share 1 – 3 Possible Solutions

1.a.–b. Answers may vary considerably.

2. The properties of the line are generally easier to find with a graphical approach, although we have to estimate when lines don't pass through integral coordinates.

2. a. Values may have to be estimated and, hence, only an approximate equation can be found.

   b. Values may have to be estimated and, hence, only an approximate equation can be found.
