

How to use the Tiny Scanner App

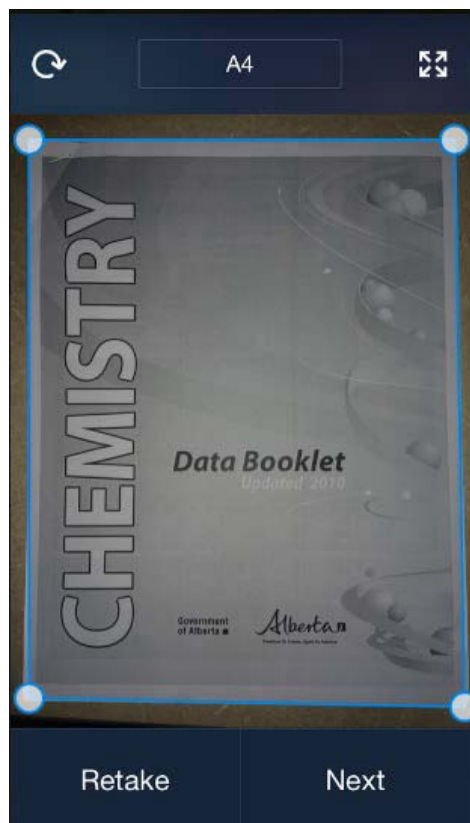

- 1) Download  to your phone, for free!
- 2) Open the app:

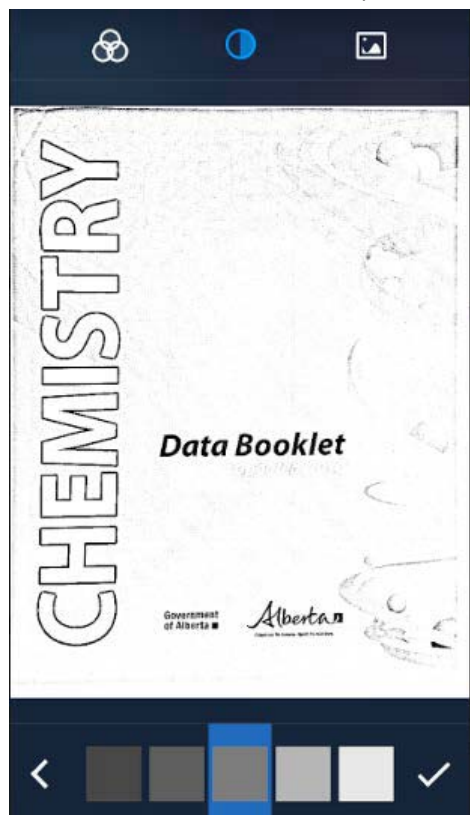

- 3) Click the + button to start scanning your work. Allow the app to access your camera.
- 4) Center your first page in the camera screen and take a picture:

- 5) Make sure your entire page is selected by the blue outline. Drag the corners of the box to select the entire page if you need to. Click Next (iPhone) or the checkmark (Android).

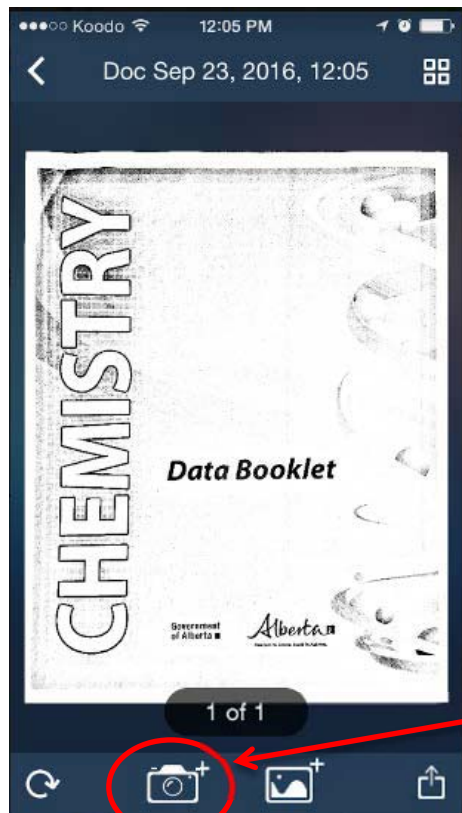

- 6) Your page will show up as a black and white scan. Adjust the grey scale as needed. Click the checkmark. (A black and white scan is the best way to submit your work since a colour scan may make the file size too big.)

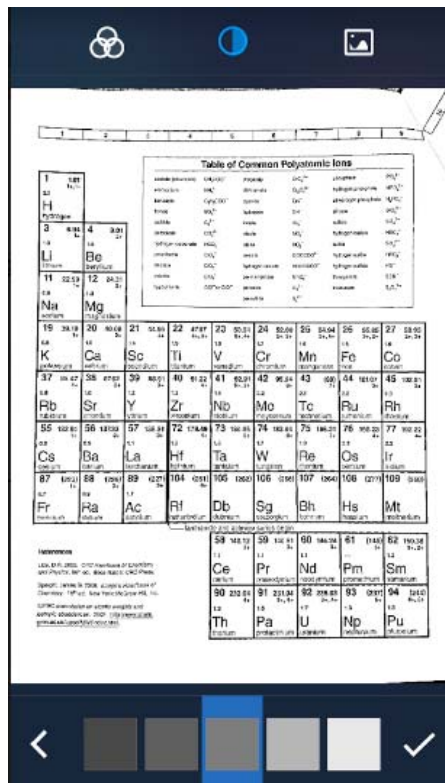

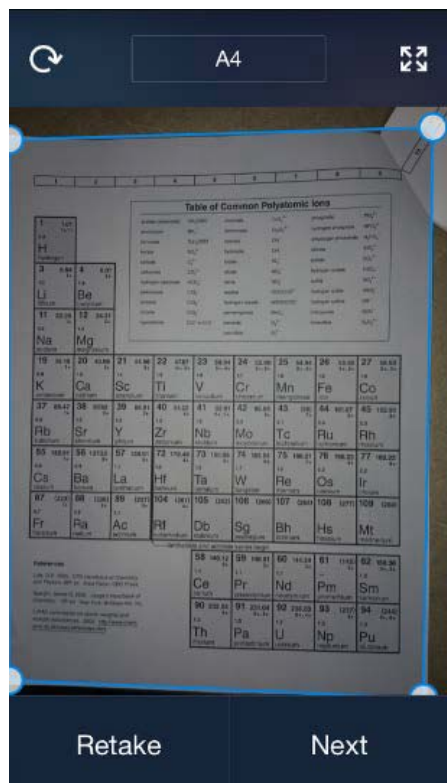

7) To add the next page in your assignment, click the camera+ icon:

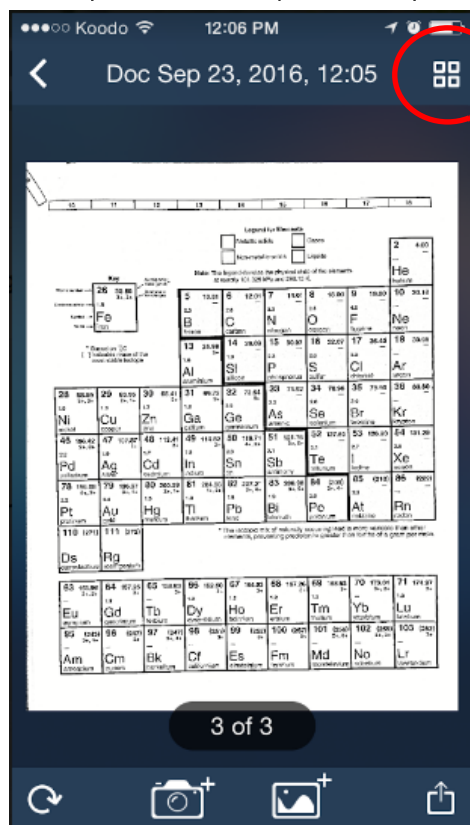

Click this icon to add your next page.

8) Centre your next page and take a picture. Make sure the blue box selects the entire page. Drag the corners as needed. Click Next and adjust the grey scale as needed. Click the checkmark. Repeat Steps 7-8 until you have taken pictures of all the pages in your assignment.

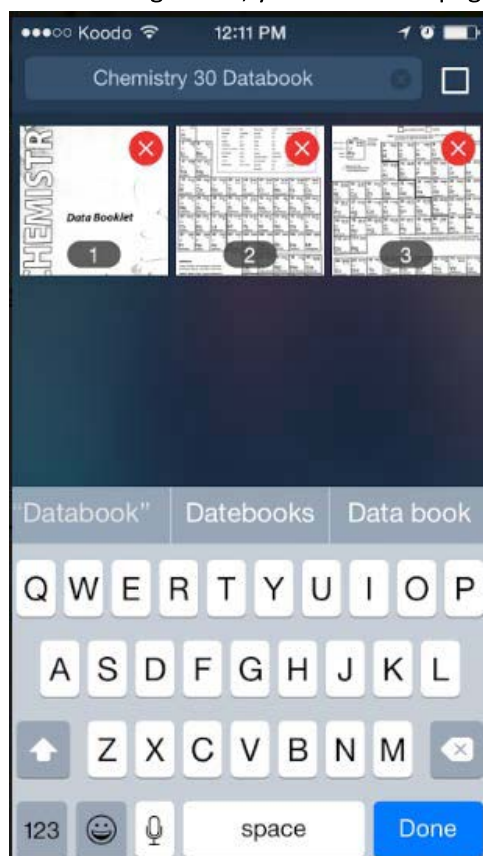

- 9) When you have taken pictures of your entire assignment, you may rename your file by clicking the  icon:

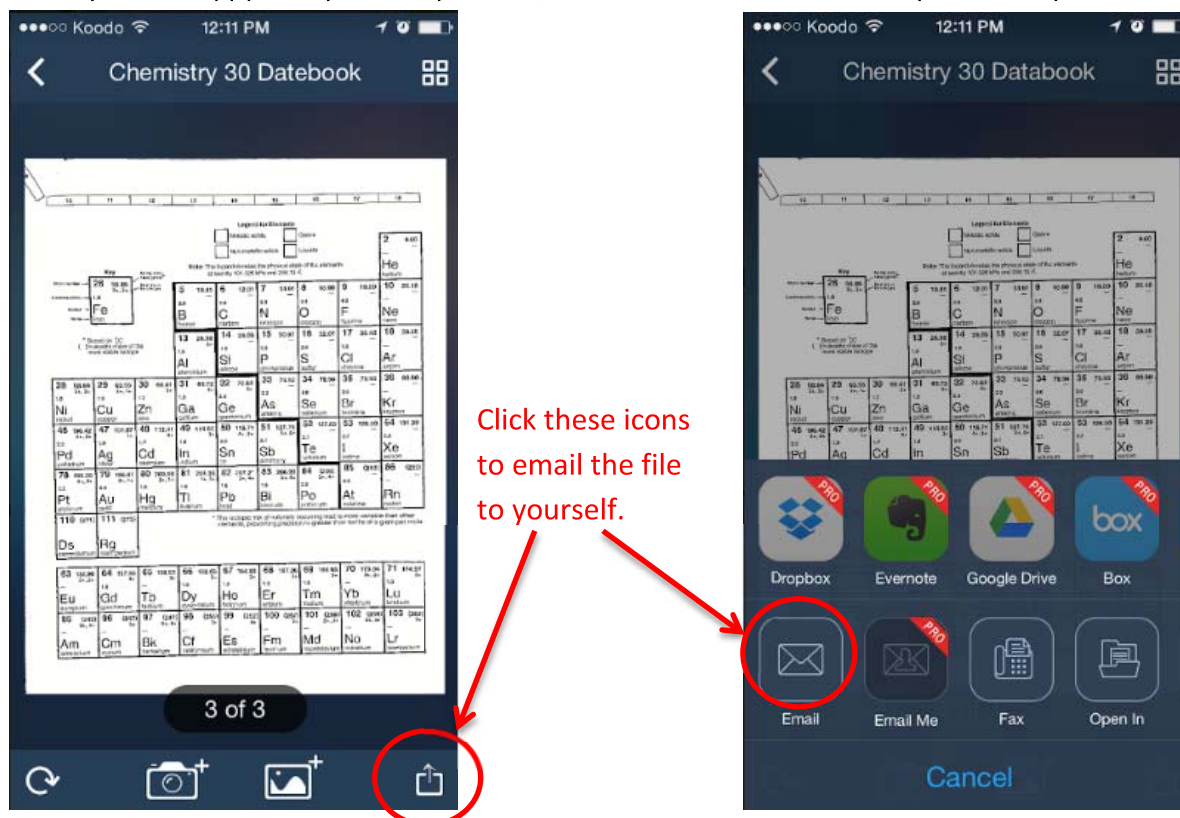

Click this icon to
rename your file or
delete pages.

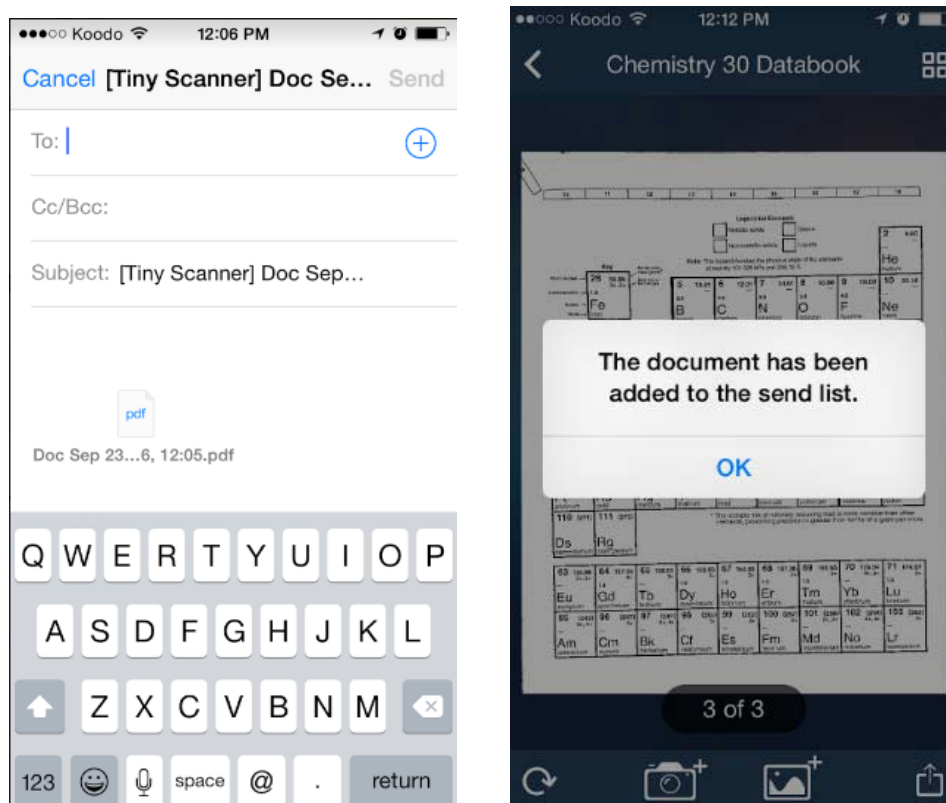

- 10) After clicking , you can delete pages and rename your file:

11) When you are happy with your complete file, click the  icon to email your file to yourself:

12) Type in your email address and hit Send:

13) Once you receive your file, download it to your computer then upload it to your course for grading.
