

## Activity 2: Changing States

**How does water change its physical state?**

Answer the following questions.

### Instructions

1. What could you do to make matter change states?

---

---

---

---

2. Draw a diagram to show water's changing state. Use the words gas, liquid, solid, evaporation, condensation, freezing/solidification, and heat. In your diagram use red arrows for the addition of heat and blue arrows for the removal of heat.

Check your answers on p. 59.
