

Exit Pass: Lesson 2

Precipitation

Complete the following.

Questions

1. What happens to water vapour in air when the temperature of the air drops below the dew point?

2. Explain the difference between how snow forms and how hail forms.

3. Forest rangers often keep a close watch on humidity, which has an effect on forest fire danger.

Do you think forest fires are more likely when the humidity is high or when the humidity is low? Explain your answer.
