Waste & Our World

Date: _____

How Can We Protect Our Natural Resources?

Observe: Reduce, Reuse, Recycle

Question

How can I reduce, reuse, and recycle?

Reduce, **reuse**, and **recycle** are the 3 Rs of waste management. **Reduce** means to cut down on the amount of things you use. We can do that by using less stuff and using only what we need. **Reuse** means that something can be used over again. To **recycle** is using something again in a different way by taking the materials and using it to make something new. By **reducing**, **reusing**, and **recycling**, we can be sure that less waste ends in landfills. This helps to **conserve** the **environment** and **natural resources**.

Resources

Access the website links from the online course.

- BrainPop video: Reduce, Reuse, Recycle (website)
 - Username: 0099
 - Password: students
- *3 Rs Chart*

Instructions

- 1 Watch the BrainPop video called **Reduce, Reuse, Recycle** (see login information above).
- 2 Listen for ways to reduce, reuse, and recycle. The video gives many ideas.
- 3 Write them into the **3 Rs Chart** located on the next page. Press the 'pause' button on the video if you need time to hear and write down the ideas.
