

Science 9
Unit A: Biological Diversity
Lesson 7
Practice Worksheet 5: Fertilization in Animals

Complete the following questions.

Question 1

Sexual reproduction in animals involves male and female gametes.

- a) What are two names for the female gamete in animals?

 - b) What is the name of the male gamete in animals?
-
-

Question 2

Describe what happens when a male and female gamete join.

What is the name of this process?

What is the name of the cell formed when the gametes join?

Question 3

Describe what happens after the first cell of a new organism is formed, in sexual reproduction.

Congratulations! You have completed this practice worksheet.

Now it's time to carefully compare your answers to the suggested answers in the online course. When comparing, you should feel free to make changes to your answers or make extra notes.

Keep this practice worksheet for study purposes. Using practice worksheets as a study tool to review for exams is a great idea.

If you unsure about any of the questions or answers, or you just want more feedback, share this practice worksheet with your teacher and ask for assistance. You can do that by emailing the teacher, or by submitting it in the Course Questions Forum in the online course. If you are using this practice worksheet in Google Drive, don't forget to change the sharing settings so that anyone can view it before sending the link to your teacher.
