## 1-1: Using Scale on a map

Download, save, and complete the [Using Scale on a Map](#) activity. It is highly recommended that you print the map to measure the distances.

# Canada

**Make a paper scale. Then, answer the questions below.**

a) The distance between Ottawa and Quebec is about how many km? (/1 mark)

b) The distance between Edmonton and Regina is about how many km? (/1 mark)

c) The distance between Whitehorse and Yellowknife is about how many km? (/1 mark)

d) The distance between Ottawa and Winnipeg is about how many km? (/1 mark)

e) Choose two cities and list their names below. What is the approximate distance between these two cities in km? (/1 mark)

f) What is the scale used on the map? (/1 mark)

**Overall Total: /6 marks**

**Save Your File**

Name your file in this format: jsmithss5\_1-1-scale and save your file to your Unit 1 Notebook folder.
