

## Activity 14: Soil Evidence

How can soil evidence be traced to its source?

### Instructions

1. Study the pictures of various soil samples in the **Soil Sample Table**.
2. In the table, write descriptions for each soil sample.
3. Based on your observations of each soil sample, match each soil sample to one of the locations shown.

### Need a Hint?

Think about what type of soil you are most likely to find at each of these locations.

Soil Sample	What colour(s) is it?	Describe the soil particles. Need a Hint? Are they big? small? all the same size? shiny? dull?	What is in the soil sample? Need a Hint? Do you see sand? rocks? grass? clay? other stuff?
			
			
			

### Location Pictures

---

Match the pictures with their corresponding soil samples.
