Video Watching Strategies

Observe the speakers. What are they doing? Most people use hand signals and body language while they are talking.

Use your eyes to see if they are

- pointing to something
- touching or holding something
- smiling, laughing, or crying
- talking to someone else

There are many things that you can understand just by observing the speaker. Also, pay attention to what the person says. You may recognize some words. Then, make a connection with what you see and the words that you already know. You will have an idea of what they are saying.

At the beginning it's difficult, but you will begin to understand more and more with practice. So keep your eyes open!
