

# Lesson 1: Unit Price

## Summary

Review what you have learned prior to completing the Lesson Assignment.

### Key Ideas

- Unit prices are used to compare the price per item of goods or services.
- Unit Price can be calculated per single unit or per standard unit, such as per 100 grams.
- The better deal is not determined by price alone. The quality and quantity required of the product must also be considered.

### Key Terms

- Unit Price
- Quality of items
- Quantity of items
