

## Practice Run

1. Determine the value of  $x$ .

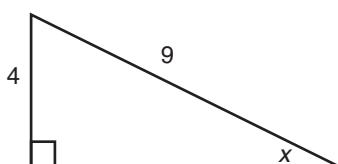

2. Determine the value of  $n$ .

Compare your answers.

1. Determine the value of  $x$ .

$$\sin x = \frac{\text{side opposite } x}{\text{hypotenuse}}$$

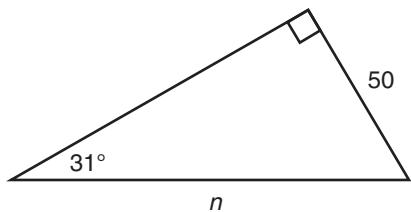

$$\sin x = \frac{4}{9}$$

$$x = \sin^{-1}\left(\frac{4}{9}\right)$$

$$x = 26.38\dots^\circ$$

$$x \doteq 26.4^\circ$$

2. Determine the value of  $n$ .

$$\sin x = \frac{\text{side opposite } x}{\text{hypotenuse}}$$

$$\sin 31^\circ = \frac{50}{n}$$

$$0.515\dots = \frac{50}{n}$$

$$n \cdot 0.515\dots = \frac{50}{\cancel{n}} \cdot \cancel{n}$$

$$(0.515\dots)n = 50$$

$$n = \frac{50}{0.515\dots}$$

$$n = 97.08\dots$$

$$n \doteq 97.1$$
