

Practice – 1

Once you feel confident with the chain rule, complete problem 1. Check your answers by going to the Solutions tab in Moodle.

Instructions: Answer each of the following practice questions on a separate piece of paper. Step by step solutions are provided under the Solutions tab. You will learn the material more thoroughly if you complete the questions before checking the answers.

1. Using the chain rule, find the derivative of each function.

a. $h(x) = (2x - 5)^3$

b. $g(x) = (x^3 + 4x^2 + 1)^{89}$

c. $h(x) = \frac{3}{(7x + 1)^{\frac{5}{3}}}$

d. $f(x) = \sqrt{3x - 1}$

e. $h(x) = \frac{3}{\sqrt[3]{2x + 3}}$
