Selected voices should be English speaking in most cases. See what happens if you select a Spanish voice to speak your English document

Features

Tools support literacy and language development:

- Speech to text (Talk and Type)
- Text to Speech
- Dictionaries
- Prediction
- Check it (in google docs)

Dictionaries and Prediction also speak the words

Features

Screen Mask – Highlights sentence by sentence to assist with reading.

Audio Maker – select a section of text, click on audio maker. Creates an mp3 of the text.

Translate – Google translate button.

Practice Reading Aloud – students can highlight a section of text, record themselves reading it and send the recording to their teacher

Web Search – highlight a name or location or phrase and click on web search. Opens a google search page

Features – Highlighters

Highlighters
Can be used as highlighters but in Docs, the web, and pdfs can be used to sort data and create vocabulary lists

Gather Data
Colours matter:
Use coloured highlighters to highlight words, sentences or paragraphs. Click on the "gather highlights tool" and a document is created that sorts the data into categories by colour. Rename the document.

Create vocabulary lists
Colour doesn't matter:
Highlight single words any colour you want. Click on the vocabulary tool. A document is created that gives a definition and picture of each word. Great for learning new terms. Remember to rename the document!

Have inaccessible text uploaded for students? Use Screenshot reader to read and grab editable text. Or use Snapverter.

This add on from TextHelp (creators of R&W) with scanned documents. It will convert them into accessible text that can be read by screen readers. (depending on the quality of the original document)

Screenshot reader and Snapverter

Converts inaccessible text to accessible text.
Screenshot reader is free. However, there is a free trial for Snapverter. Subscriptions can be purchased but the free version can be used to convert a limited number of documents per month.

https://www.texthelp.com/en-us/products/snapverter/

5. Create a cleaning and disinfection schedule to execute multiple times a day for common areas and frequently touched items such as doorknobs, light switches, horse stalls (including stall door latches), tack rooms, wash stalls, hoses, sprayers, bathing and grooming equipment, cross-ties, pitch forks, brooms, shovels, wheelbarrows, and tack. Have clear guidelines for disinfection of different items and who is responsible.

6. Consider setting up outdoor grooming stalls if practical, or

Additional Supports

https://www.datadesk.texthelp.com

R&W has a tool for gathering data on student use of R&W as well as the ability to limit features available while students are in Classroom and using uploaded documents. This is especially helpful if, for example, teachers' copies of pdfs are being annotated by students.
Log in with Google - the program will load your Classrooms.

DataDesk

If you are using Google Classroom check out this great tool.

Equatio - Makes Math Digital
Teachers have free premium accounts
https://www.texthelp.com/en-us/products/equatio/

How to Guide

Registration Guide for Teachers:
Step 1: Add EquatIO from the Chrome Web Store
Step 2: Fill out the Free Teacher Account Registration Form here
*Make sure to use your RVSchools account in the email field. They already know you have R&W so just select EquatIO. Add an administrator and you should be ready to go.
